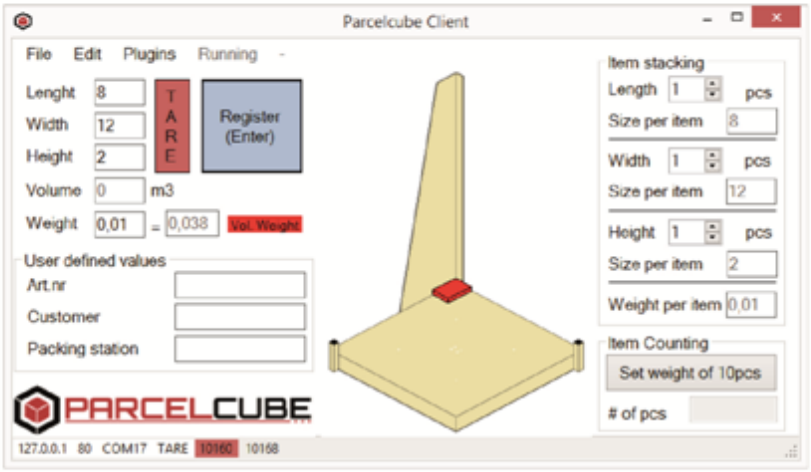
PARCELCUBE

Designed and produced in Scandinavia

Affordable and reliable dimensioning



Affordable dimensioning for shipping and receiving

Parcelcube is a unique dimensioning device combining affordable pricing with high-tech dimensioning. Parcelcube is designed for accurate, reliable and efficient capturing of shipment and product data (dimensioning, weight and ID), with performance comparable to market leaders but at a fraction of cost.

Receiving - Standard PC software with real-time data transfer interface with data management and real-time data transfer as standard features. PC client can be integrated into almost any WMS or ERP system.

Shipping – A USB interface to capture weight and dimensions is currently available for Clippership and ConnectShip. Other multi-carrier or carrier provided shipping systems may also work with Parcelcube. Contact us for more information on how Parcelcube can help you save valuable time and control your shipping costs!

Parcelcube requires no on-site maintenance or calibration everything can be done though remote access support.

Top performance, user friendly interface and pricing like no other system can match!

No on-site maintenance, save 80% in costs!

ParcelCube 900 Specifications

Physical specifications

Dimensions (LxWxH) inch (cm)	27x27x45 (68x68x113)
Weight lbs (kg)	62 (28)

Performance

Dim capacity:

Minimum inch (cm):	2x2x1 (4x4x2)
Maximum inch (cm):	24x24x37 (62x62x94)
Measuring accuracy inch (cm):	+/- 0.1 (+/- 0.3)
Measuring division:	1 or 0.1

Weighting capacity

Minimum lbs (kg):	0.02 (0.01)
Maximum lbs (kg):	120 (55)
Weight divison lbs (kg):	0.01 (0.001)

Other

Power supply VAC:	100-240
Measuring sensor:	Ultrasonic
Weight sensor:	Load cell
Data Output:	Serial (COM) Port CSV File XML File HTTP
User interface:	Windows
PC connection:	USB
Operation temperature:	+50 - +86°

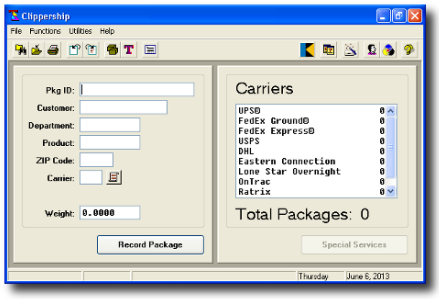
PARCELCUBE

Designed and produced in Scandinavia

Affordable and reliable dimensioning

Least cost shipping, with top performance in accuracy and speed, is what you get when you attach a Parcelcube to Kewill's Multi-Carrier Clippership system!

- Clippership is the most widely deployed and recognized shipping system
- Supports UPS, UPS SurePost, FedEx, FedEx SmartPost, USPS, DHL, Eastern Connection, LTL, and more
- Truly Rate shop for the lowest cost delivery option among your contracted carriers
- An extremely functional and customizable system that is designed to be operator friendly, requires little training, and is easy to deploy
- Time-tested and most reliable!
- Exceptional support and resourcefulness gives you a peace of mind that your shipping system will meet the future demands of your ever changing world



Companion Product

IN-KCS *Mail*™ add-on for Endicia or Stamps.com

No meter, no manifests, no audits, and no minimum volume requirements means shipping with the USPS has just got a whole lot easier! IN-KCS Mail takes Clippership's USPS shipping to a whole new level. Printing USPS prepaid postage address labels is just the beginning of what this powerful Clippership add-on can do with features to help you…

- Instantly qualify for USPS Commercial discounted rates
- Validate all domestic ship to addresses for all carriers
- Automatically marks as Residential or Home Delivery to ensure proper rating, including when rate shopping
- Supports virtually all USPS single piece domestic & international services, including Cubic pricing
- Labels & Customs docs print on your existing 4x6 labels

APPLICATIONS

Warehouse, distribution and mail room

Optimize packaging, shipping items in oversized cartons costs money – the Parcelcube PC client alarms if volume (dimensional) weight is greater.

Shipping, freight costs are almost impossible to calculate manually with dim factor, dimensional weight etc., with ParcelCube it`s done simply by pressing a button, saving minutes per shipment.

Receiving and storage optimization, register product master data (dimensions, weight) automatically into your WMS/ERP. Optimize storage space, automated shipment volume calculation based on stored product master data.

Freight, courier and shipping companies

Recapture lost revenue, by automatically re-measuring and re-weighing you can increase revenue 5-20%.

Eliminate errors from manual data entry and manual measuring by using Parcelcube to automatically capture dimensions and weight and calculate chargeable weight.

Couriers, use Parcelcube at a desk to define correct chargeable weight instantly or even in your truck as a mobile device through the Parcelcube USB power supply connected to a PC.
